I, Dr Denise Wong certify that
(Name of Accredited Veterinarian)

- (i) As far as can be determined, the specimens in the consignment do not contain any agent causing anthrax and rabies.
- (ii) Each specimen is placed in an air-tight translucent container (so that the contents can be seen through the container) which is adequately labeled, and is further packed within another air-tight container which is made of non-fragile material and which is packed to prevent breakage of the container holding the specimen. The exterior of the containers has been thoroughly de-contaminated.
- (iii) The serum sample(s) is/are non-hazardous and do(es) not contain any infectious or contagious agent.
- (iv) The serum sample(s) was/were taken from animal(s) that are healthy and clinically free from contagious disease and this/these animal(s) has/have not been exposed to any matter of animal origin.

Sample Checked & Performed by	

- a) Please complete ALL of the sections on the application form to help with the smooth running of the application processing.
- b) Sample should be frozen while awaiting submission and to be place in a cooler bag during transportation. We reserve the right to reject samples that are poorly stored before or during transportation and/or insufficient samples. New samples will be requested.
- c) We reserve the right to charge additional fees for subsequent tests requested to be performed due to negative results from bacterial contamination. Therefore an aseptic protocol during blood collection is vital.
